

The Powerful Anti-Aging Properties of Retinol

The innovative AGERA® delivery system harnesses “nanoemulsion technology™” to deliver powerful, protecting ingredients

Clinically Shown to Reverse Signs of Aging—Retinol Smooths and Exfoliates the Skin

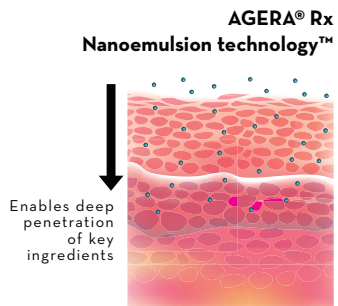

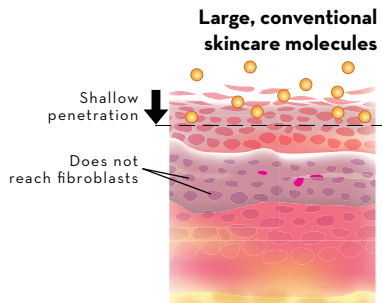

- Promotes a fresher, more radiant glow by increasing the blood supply to the upper layers of the skin
- Stimulates collagen production and helps to rebuild and repair elastin fibers
- Accelerates cell turnover, encouraging dead skin cells to naturally exfoliate more quickly
- Helps aid in the repair of sun-damaged skin
- Helps minimize the appearance of large pores

AGERA® Technology Penetrates the Skin—Enables Rapid Results Without Irritation

- AGERA® skincare products utilize nanoemulsion technology™ to deliver the powerful anti-aging benefits of Retinol (Vitamin A)
- Nanosomes penetrate the skin as time-release capsules, enabling the Retinol to effectively stimulate repair
- The result is a visible reduction of fine lines, wrinkles, and uneven skin tone

Innovative Ingredients and Exclusive Formulations

Visible Results Without Irritation

AGERA® Laboratories has developed a wide range of scientifically designed products formulated to penetrate the skin and activate its healing potential.

- **Specially manufactured nanoemulsion and nanoparticles** allow powerful ingredients to penetrate and promote healthy skin
- **Proprietary proliferative Lipopeptides** developed to help stimulate collagen and elastin for firmer, younger-looking skin
- **Powerful antioxidants** combat free radical damage for smoother, softer skin
- **Retinol** penetrates the skin to help reverse the appearance of fine lines and wrinkles and reveal new radiance
