

The Revolutionary New Approach to Skin Peels

A new generation of skin peels—penetrate and stimulate for beautiful results without irritation

AGERA® skin peels are designed to be gentle to start and then are gradually increased in strength as the skin becomes more accepting of the procedure.

Although results are visible after just 1 session, several AGERA® peels (usually on a weekly basis) are required to see the maximum effect.

Unique, No-Downtime Skin Peels—Visible Results Without Unsightly Skin Shedding, Redness, or Irritation

- Other skin peels utilize glycolic acid to “burn” through the upper skin layers and stimulate a wound-healing response
- AGERA® peels work differently, utilizing a combination of anhydrous peeling materials that penetrate deeply to enhance the post-procedure matrix response without causing significant irritation
- AGERA® peels are activated by adding cold water that switches “on” the peel, causing significant stimulation of the fibroblasts deep within the skin
- AGERA® peels are pain-free and nonirritating, even for sensitive skin

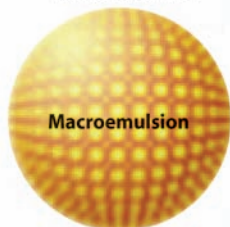

Maximize Results Without Harming the Skin—Unique Peels for Aging, Pigmented, Sun-Damaged, and Acne-Prone Skin

- Anti-aging peels help eliminate fine lines and wrinkles for a firmer, smoother, more radiant appearance
- Acne peels reduce blocked pores and redness, and dramatically reduce the risk of future scarring
- Pigmentation skin peels gently and effectively reduce the appearance of unwanted discoloration for a more even skin tone

AGERA®
Nanoemulsion technology™

Visible Results Without Irritation

AGERA® Laboratories has developed a wide range of scientifically designed products formulated to penetrate the skin and activate its healing potential.

- **Specially manufactured nanoemulsion and nanoparticles** allow powerful ingredients to penetrate and promote healthy skin
- **Proprietary proliferative Lipopeptides** developed to help stimulate collagen and elastin for firmer, younger-looking skin
- **Powerful antioxidants** combat free radical damage for smoother, softer skin
- **Retinol** penetrates the skin to help reverse the appearance of fine lines and wrinkles and reveal new radiance
