

# Anti-Aging Formulations That Make a Difference

## **Advanced skincare technology—effective delivery of key anti-aging ingredients**

AGERA® nanoemulsion particles penetrate the skin, targeting fibroblasts to stimulate collagen and elastin production. This exclusive delivery technology enables effective activation of the repair response.

## **Designed for the Special Needs of Aging Skin—Visible Results Without Irritation**

- Scientifically developed to penetrate, stimulate, and nourish the skin, reducing fine lines and wrinkles and helping restore a more youthful appearance
- Developed with a combination of powerful antioxidants, proprietary proliferative Lipopeptides, and Retinol
- Designed to help control the skin's internal aging process while restoring and maintaining its thickness and resilience

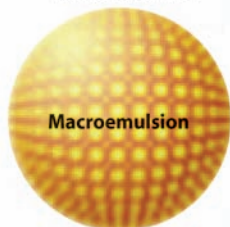

## **Exclusive Formulations and Ingredients—Penetrate and Stimulate for Maximum Results**

- Proliferative Lipopeptides help stimulate the cells to produce new collagen and elastin for firmer, thicker, more vibrant-looking skin
- Powerful antioxidants help combat free radical damage and restore a smoother, softer texture to the skin
- Retinol helps reverse many signs of aging, such as fine lines, wrinkles, and uneven skin tone

Nanoemulsion technology™

## Visible Results Without Irritation

AGERA® Laboratories has developed a wide range of scientifically designed products formulated to penetrate the skin and activate its healing potential.

- **Specially manufactured nanoemulsion and nanoparticles** allow powerful ingredients to penetrate and promote healthy skin
- **Proprietary proliferative Lipopeptides** developed to help stimulate collagen and elastin for firmer, younger-looking skin
- **Powerful antioxidants** combat free radical damage for smoother, softer skin
- **Retinol** penetrates the skin to help reverse the appearance of fine lines and wrinkles and reveal new radiance
